Control of the permit is still with MSA. We are not planning to assume control until after Rev 9 is issued. I do have the current version, as of 9/5/12, on L: drive... located at:

Can you please tell me if NWP now has 100 % configuration control of our permit, not MSA or Energy?

Subject: Current Rev 8C Hanford Permit Location

The current version of Rev 8c (as of 9/5/2012) is located here:
[REDACTED] However, this folder does NOT include WTP.

These files should be used as the current permit and can be placed on the website. Also, please note, portions of the permit are updated (i.e. modified) quarterly with the next update expected within the month. Any questions, please give me a holler.
